EDUCATION

Case Western Reserve University, School of Medicine
Master's of Science in Biostatistics

- Specialization in Genomics and Bioinformatics.

Cleveland, Ohio

August 2025 - Expected August 2026

The Ohio State University, College of Arts and Sciences
Bachelor's of Science in Data Analytics

GPA: 3.62 (unweighted)

- Specialization in Biomedical and Public Health Analytics.
- Interest in bioinformatics, biostatistics, and computational biology.
- Cum Laude & The Ohio State Dean's List student.

Columbus, Ohio

August 2021 - May 2025

SKILLS

Relevant Coursework

- **Data Analytics:** Introduction to Database Systems, Systems modeling and Optimization for Analytics, Statistical Modeling for Discovery, Linear Algebra, Calculus I & II, Programming Java, Statistical Inference for Data Analytics, Software II: Software Development and Design, Foundations I: Discrete Structures, Overview of Computer Systems, Data Management in the Cloud, Statistical Modeling for Discovery II, Intro to Statistical Learning, Data Mining, and Bayesian Analysis.
- **Life Sciences, Bioinformatics, & Biostatistics:** Chemistry, Biology, Molecular Genetics, Intro to Bioinformatics, Bioinformatics, Public Health Data Analytics, Methods in Bioinformatics and Data Analysis, Intro to Research Informatics, A Data-Driven Introduction to Genomics and Human Health, and Epidemiology.

Skills

- **Programming Languages:** Proficient in Python, R, SQL, SAS, Stata, Java, C++, and C.
- **Statistical & Analytical Skills:** Expertise in statistical modeling, including linear and nonlinear regression (Python, R), single and multiple imputation, machine learning, AI, Bayesian statistics, and linear optimization .
- **Analytical Concepts:** Strong foundation in statistics, computer science, mathematics, and linear programming.
- **Bioinformatics/Biostatistics:** Familiarity with biomedical and bioinformatics methodologies, such as volcano plots, functional enrichment, PCA, DESeq, GO Enrichment, GWAS, and Cox Proportional Hazard Modeling.

Projects

- **Genomic Data - TCGA-BRCA Survival Analysis:** Analyzed a TCGA-BRCA dataset to explore the relationship between gene expression and patient survival. Downloaded and preprocessed gene expression and clinical data, conducted feature selection to identify the top 100 survival-associated genes, and used k-means clustering to categorize patients based on gene expression profiles. Performed survival analysis within clusters using Cox Proportional Hazards models and Kaplan-Meier survival curves, interpreting hazard ratios and survival patterns across gene expression levels.
- **Genomic Data - TCGA-LUAD RNA Sequencing:** Did RNA sequencing using a TCGA-LUAD dataset. Performed differential analysis and functional enrichment.

PROFESSIONAL EXPERIENCE

Progressive Insurance

Warehouse Employee

- Collaborated with many team members to ship out various electronics to employees throughout the country.
- Learned to inventory, track, and create tickets and labels for all electronics in the warehouse facility.

Highland Heights, Ohio

May - August 2022/2023

Neubert Painting Company

Exterior House Painter

- Painted the exterior of multiple houses throughout the northeast Ohio area.
- Collaborated with multiple other painters on projects.
- Learned advanced techniques to complete difficult painting situations.

Brook Park, Ohio

May 2021 – July 2021

LEADERSHIP/INVOLVEMENT

Business Scholars Program

Member

- Chosen based on academic merit, extracurriculars and essay.
- One of nearly 50 people chosen out of thousands of applicants.

Columbus, Ohio

August 2021 - May 2025

Big Data and Analytics Association

Member

Columbus, Ohio

October 2021 - May 2025
